Five Kodiak Mountain Goat Registration Hunts to Open November 1; Four Others Will Remain Closed

(Kodiak) – Four popular Kodiak Island registration mountain goat hunts will not open this year because drawing hunt harvests earlier this fall have met harvest objectives. Five other goat hunts are scheduled to open November 1.

Registration hunts scheduled to open include RG471 (Wild Creek - Center Mountain), RG474 (Uganik River), RG476 (Kiliuda Bay), bow and arrow-only hunt RG479 (North Road System), and bow and arrow/crossbow/muzzleloader-only hunt RG489 (North Road System). To participate in RG474, hunters must first pick up a permit at the tribal offices in Port Lions. For RG476, permits are available in the tribal offices in Old Harbor. Permits for registration hunts RG479 (North Road System; bow and arrow-only) and RG489 (North Road System; bow and arrow/crossbow/muzzleloader-only) are only available at the Kodiak Fish and Game office. Only certified bow and arrow hunters may obtain a permit for RG479 and only certified bow and arrow/crossbow/muzzleloader hunters may obtain a permit for RG489. Hunters must be certified with their weapon of choice prior to obtaining a permit. Registration hunt RG480 (southwest Kodiak) opened August 20 and will remain open until March 20, unless closed by emergency order. Registration mountain goat hunts are controlled by harvest quota and hunters are encouraged to contact the Kodiak office at 907-486-1880 prior to hunting to check individual hunt status.

Registration hunts that will not open include RG472 (Crown Mountain), RG473 (Hidden Basin - East Terror Lake), RG478 (South Road System), and archery/crossbow/muzzleloader-only hunt RG488 (South Road System). Mild, relatively dry weather during the drawing hunt seasons created optimal hunting conditions resulting in high hunter success.

Ten Kodiak Island mountain goat hunts are managed by drawing and/or registration permits. Goat harvest quotas are established annually for each hunt area. Harvest quotas in individual permit areas range from 5 percent to 20 percent. If harvest objectives are not met during the drawing permit season, registration permits may be issued. In the southwestern part of Kodiak Island (RG480) where goat populations are expanding, liberal hunting regulations allow up to a seven-month registration hunt with a two-goat bag limit for resident and nonresident hunters. Hunters intending to harvest two goats must obtain two permits and must report on both permits individually. Hunters obtaining two hunt permits for RG480 are limited to taking only 1 male goat.

Mountain goats on Kodiak originated from 11 females and seven males moved from the Kenai Peninsula to the Hidden Basin area in 1952 and 1953. The first hunting season was authorized in 1968, and permits have been

issued each year since with permit numbers and open areas changing to reflect population trends and goat movements. Mountain goats currently occupy nearly all available goat habitats on the island, and goats have been confirmed as far southwest as Halibut Bay and Akalura Lake. Based on data from comprehensive aerial surveys, Kodiak Island's goat population is estimated at approximately 3,200 goats.
